

1.0 Stumpage

The stumpage rate is estimated to be \$0.25/m³ for sawlog grades 1 and 2 that are removed in log form under the FLTC. A confirmed stumpage rate, based on the effective date of the cutting authority, will be determined when the FLtC is issued. This confirmed rate will be subject to quarterly adjustments as per the Interior Appraisal Manual. The stumpage rate for dry grade 4 and grade 6 logs will be \$0.25/m³ based on normal weight scaling procedures. Timber that is ground into hog fuel or chipped on the FLTC area will have an equivalent stumpage rate of \$0.25/m³. All stumpage rates will be fixed for the term of the FLTC and any extensions.
